

DRIVEN BY POSSIBILITY™

TIMING SYSTEM:

TIMING COMPONENT KIT WITH WATER PUMP

EXCEPTIONAL MATERIALS & CONSTRUCTION

THE SOURCE FOR QUALITY TCKWPS

Never compromise on the performance or quality of a Timing Component Kit with Water Pump (TCKWP). With the most OE Exact coverage, Gates combines the highest level of expertise, exceptional service and critical extras, offering them at an incredible value.

DRIVEN BY POSSIBILITY™

GROWTH IN DEMAND

//////
TCKWPs are one of the fastest growing categories in the Automotive Aftermarket. Gates® kits are the most complete kits in the industry and include the timing component, water pump and all the necessary gaskets and hardware required to perform the entire job. In addition, many kits contain Technical Service Bulletins that highlight attention to troublesome applications. Gates also offers TCKs only when a water pump is not needed.

All of the parts in a system are engineered to work in concert and wear at about the same rate. Be system smart and repair the full serpentine, timing or cooling system, and not just a single part, keeping your customers out of the shop and on the road.

Gates is your source for OE or better TCKWPs.
Ask your sales representative for more information.

WHY GATES TCKWPS?

- All components included in Gates timing kits are designed to meet or exceed OE performance
- Distinctive belt construction enhancements as required by specified vehicles
- Kits include all parts required to do the complete job
- Backed by the industry's best warranty
- Instructional videos and a Technical Support Team available to assist for an easy and proper installation

BENEFITS TO YOUR CONSUMER

- Avoid costly labor charges later by replacing components all at once, rather than separately
- TCKWPs allow you to service the entire timing system
- Properly functioning timing systems improve your customer's fuel economy
